About the Client

AB Capital Services is a Dubai-based business consultancy helping entrepreneurs and foreign investors navigate company formation, corporate bank account opening, VAT filing, and accounting services in the UAE. Their core clientele includes Indian and Russian entrepreneurs looking to establish a presence in Dubai, and existing UAE SMEs seeking CFO-level financial support. Founded in 2019, the firm had grown largely through referrals before engaging Obsidian Digital for performance marketing.

The Challenge

- Highly competitive Google Ads landscape — keywords like 'company formation Dubai' and 'corporate bank account UAE' had CPCs between AED 8–22, making unoptimized campaigns expensive.
- Previous Meta Ads campaigns generated 400+ leads/month but with very low quality — most inquiries came from job seekers and students, not decision-making entrepreneurs.
- Zero Google Search presence — competitors like Commitbiz, Shuraa, and Virtuzone were dominating SERP for high-intent queries.
- No conversion tracking set up — leads were being counted from form submissions that included bots and duplicates, inflating numbers with zero revenue attribution.
- Client needed a CPL under AED 15 to maintain sustainable unit economics on a ₹40,000 average service value.

Our Google Ads Strategy

Campaign Architecture

Campaign	Type	Daily Budget	Bidding Strategy	Goal
Brand Protection	Search — Exact	AED 40	Target Impression Share	Own brand SERP
Company Formation — UAE	Search — Phrase+Exact	AED 160	Max Conversions (then tCPA)	Qualified leads
Corporate Bank Account	Search — Phrase+Exact	AED 130	Target CPA: AED 12	Bank inquiry leads
VAT & Accounting	Search — Broad+Phrase	AED 90	Max Clicks (first 30 days)	Service enquiries
Competitor Conquest	Search — Exact	AED 75	Manual CPC	Switcher capture
Remarketing — Hot	Display (3-day visitors)	AED 60	Target CPA	Re-engage intent
YouTube — Awareness	In-Stream 15s	AED 100	Target CPV	Top-of-funnel reach
Performance Max	All channels	AED 120	Target ROAS: 40x	Volume expansion

Keyword & Negative Keyword Strategy

Built a 3-tier keyword architecture: Tier 1 — Exact Match for highest-intent buyer terms ('setup company in dubai free zone', 'open corporate bank account uae'); Tier 2 — Phrase Match for mid-funnel expansion; Tier 3 — Broad Match with Smart Bidding only after 45-day conversion data. Maintained a master negative keyword list of 520+ terms to eliminate clicks from job seekers ('company formation jobs'), students ('company formation assignment'), and irrelevant geos (Saudi Arabia, Qatar, Egypt).

Ad Creative & Landing Page

Deployed RSAs (15 headlines, 4 descriptions) per ad group with tested differentiators: '100% Approval Rate', 'Bank Account in 5 Days', 'Dedicated Relationship Manager from Day 1', '500+ Businesses Setup'. Used Lead Form Extensions, Call Extensions with call tracking, and Sitelinks to service pages. Landing pages A/B tested: 3-field form outperformed 7-field form by 44% in conversion rate. WhatsApp CTA above the fold. Page speed maintained at sub-1.8s load time with social proof (Google Reviews widget, client logos, press mentions).

Campaign-Wise Breakdown

Campaign	Spend (AED)	Leads	CPL (AED)	Conv. Rate
Company Formation — Search	82,400	9,820	8.39	19.1%
Corporate Bank Account — Search	61,200	7,140	8.57	16.8%
VAT & Accounting Services	44,800	4,370	10.25	14.3%
Competitor Conquest	28,600	2,980	9.60	15.7%
Remarketing — Display	19,400	3,810	5.09	Warm audience
Performance Max	75,600	3,280	23.05	9.1%

Key Insight — Full-Funnel Attribution

Visitors who saw a YouTube awareness ad and later searched via Google converted at 2.3x the rate of cold traffic. This validated a full-funnel Google strategy over isolated Search-only

campaigns. Remarketing campaigns delivered CPL as low as AED 5.09 — making the combined funnel 40% more efficient than running Search alone.

“
The quality of leads from Google Ads was night and day compared to what we were getting before. Within 3 months, our sales team started closing 2-3 deals a week directly from Google inquiries. Obsidian truly understands the UAE business landscape.”

Google Reviews

★★★★★

4.7/5.0 (188 reviews)

Verified on Google

Pachmarhi Ayurveda Pvt. Ltd. is a premium Ayurvedic D2C brand rooted in Pachmarhi, Madhya Pradesh — the only hill station in MP, renowned for its rich biodiversity and centuries-old herbal traditions. Founded by a family of practicing Vaidyas who source rare herbs directly from the Satpura forest belt, the brand offers over 80 doctor-formulated SKUs across four categories: Healthcare (immunity boosters, liver care, digestive health), Haircare (Bhringraj oil, anti-dandruff shampoos, scalp serums), Skincare (face packs, kumkumadi oil, brightening serums), and Daily Wellness (herbal teas, tulsi drops, chyawanprash). Products priced ₹350–₹2,200. Sold via own website, Amazon, and Flipkart.

The Challenge

- Fiercely competitive Google Shopping space — Patanjali, Himalaya, Mamaearth, and WOW Skin Science all running high-spend Shopping campaigns with mature product feeds.
- Product feed was poorly structured — titles lacked key attributes, GTINs were missing, images were plain white-background with no lifestyle shots, leading to low Quality Scores.
- 73% cart abandonment rate on the website with no remarketing infrastructure to recover lost revenue.
- High seasonal demand variance — Hairfall peaks July–Oct (monsoon), Immunity peaks Oct–Jan (winter), Skincare peaks March–June (summer) — none of these windows were being capitalized on with bid adjustments.
- No YouTube presence despite strong product story (Vaidya family legacy, zero chemicals) that was perfect for demo-style video content.

Our Google Ads Strategy

Product Feed Rebuild — Google Merchant Center

Rebuilt the entire GMC product feed from scratch for all 84 active SKUs. Key improvements: enriched titles with ingredient + benefit + volume + skin/hair type (e.g., 'Bhringraj Hair Oil 200ml — Ayurvedic Hairfall Control, No Mineral Oil, For All Hair Types'); added GTIN/MPN from manufacturer codes; uploaded lifestyle imagery alongside white-background shots; created custom labels for bestsellers (Label 0), seasonal items (Label 1), high-margin SKUs (Label 2). Feed approval rate improved from 61% to 97%.

Campaign Architecture

Campaign	Type	Category	Daily Budget	Bidding
Immunity & Liver Care	Search	Healthcare	₹900	Max Conv.
Hairfall & Hair Growth	Search	Haircare	₹780	tCPA ₹140
Skin Brightening Range	Search	Skincare	₹660	tCPA ₹160
Daily Wellness Shopping	Shopping — Standard	Daily Use	₹620	tROAS 9x
Brand Campaign	Search — Exact	All	₹300	tIS 90%
Cart Abandonment — Display	Display Remarketing	All	₹520	tCPA ₹80
YouTube — Product Demo	In-Stream 60s	Haircare + Skincare	₹820	Max CPV
Performance Max — Bestsellers	PMax	Top 20 SKUs	₹1,200	tROAS 10x

Seasonal Bid Calendar

Mapped a 12-month bid and budget calendar keyed to seasonal demand: Hairfall campaigns received +40% bid boost July–October (peak monsoon hairfall season), Immunity campaigns scaled up October–January (winter respiratory season), Skincare sunscreen and de-tan campaigns prioritized March–June (summer). Festival campaigns with separate creatives and dedicated landing pages launched 3 weeks before Diwali, Navratri, and Pongal.

Campaign Performance Metrics

₹28.4L Total Ad Spend	₹2.34 Cr Revenue Generated (D2C)	18,700+ Total Orders	8.2x Blended ROAS

YouTube View-Through Rate	38.2%
Best CPO — Haircare Peak Season	₹88

Before vs After — Performance Comparison

Category-Wise Performance

Category	Ad Spend (₹)	Orders	Revenue (₹)	ROAS
Healthcare — Immunity & Liver	7,20,000	4,800	58,80,000	8.2x

Haircare — Oils & Shampoos	8,40,000	5,900	72,00,000	8.6x
Skincare — Face & Serum	6,80,000	4,200	50,40,000	7.4x
Daily Wellness — Shopping	5,60,000	3,800	53,20,000	9.5x

Key Insight — Shopping Campaigns Outperformed Search

The Daily Wellness category via Shopping campaigns delivered the highest ROAS at 9.5x because these are high-frequency, impulse-purchase products (herbal teas, tulsi drops) with low competition and high purchase intent. Scaling the Shopping budget from ₹3,000/day to ₹6,200/day in Month 4 increased overall account ROAS from 6.1x to 8.2x — making Shopping the single most impactful lever in this account.

“

We had tried running ads ourselves before but could never figure out why orders would drop in off-season. Obsidian built a campaign calendar around our categories — and for the first time, we had consistent revenue throughout the year, not just during peak season.

About the Client

Kanara Studio is a Bengaluru-based ethnic wear brand for women, specializing in contemporary kurtis, saree blends, co-ord sets, and festive wear rooted in South Indian textile traditions — Kanjeevaram-inspired, block prints from Bagalkot, and Dharwad cotton blends. Price range: ₹699–₹4,500. Strong offline retail presence in Bengaluru (2 stores in Koramangala and Indiranagar) with an emerging D2C website. Target audience: women aged 22–45 in Bengaluru, Hyderabad, Chennai, and Mysore.

The Challenge

- Digital revenue was near zero — the website received under 1,800 visitors/month, mostly from direct traffic (people who already knew the brand from offline stores).
- No Google Shopping presence — product feed had never been set up; the brand was completely invisible in the ₹2,000 Cr+ online ethnic wear market.
- High fashion CPCs (₹20–₹80 for competitive terms like 'cotton kurti online') required careful bidding strategy to maintain profitability.
- 60% of annual revenue concentrated in Oct–Dec (Diwali, Navratri, Christmas) with a flat off-season — no strategy to maintain revenue momentum through Jan–Sep.
- No conversion tracking — the brand had no idea which digital source (if any) was driving their occasional online orders.

Our Google Ads Strategy

Phase 1 — Foundation (Months 1–2)

Built the entire digital measurement stack from scratch: Google Analytics 4 with enhanced e-commerce, Google Tag Manager for purchase/checkout/add-to-cart events, Google Merchant Center with feed for 210 SKUs across 6 collections, and Google Ads conversion tracking. Launched Brand Search campaign (budget ₹300/day) to protect existing brand searches and a Basic Shopping campaign (budget ₹500/day) to test product visibility before scaling.

Phase 2 — Growth (Months 3–5)

Launched intent-based Search campaigns for core product categories. Added Dynamic Search Ads (DSA) to automatically capture long-tail queries not covered by manual campaigns ('maroon cotton kurti with pocket', 'Kanjeevaram print kurti under 1500'). Launched 6-second YouTube bumper ads in Bengaluru, Hyderabad, and Chennai. Gmail Sponsored Promotions targeting subscribers of competitor email lists.

Phase 3 — Scale & Festivals (Month 6+)

Introduced Performance Max after 90+ conversions had accumulated. Launched dedicated festival campaigns for Navratri, Diwali, and Pongal — each with a dedicated landing page, festival-specific creatives, and ad copy with urgency elements ('Festive Sale: Last 3 Days', 'Only 8 Left in Your Size'). Smart Shopping for top 30 bestseller SKUs with Target ROAS bidding set at 6x.

YouTube — Brand Awareness	In-Stream	1,60,000	Brand Lift	N/A

Key Insight — Festive Urgency Ads

Festive season campaigns delivered a 7.6x ROAS — 21% above the annual account average. Adding inventory urgency to ad headlines ('Only 12 Left — Festive Sale') combined with a 3-day countdown timer on the landing page drove a 2.4x spike in CTR during Diwali week compared to always-on campaigns. Festive remarketing audiences (users who visited but didn't

buy in the 7 days before Diwali) had a 14.2% conversion rate — the highest of any audience in the account.

“

We had two physical stores in Bengaluru but almost no online presence. In under 8 months, our website went from less than 2,000 visitors to nearly 8,000 a month. More importantly, we now have customers from Chennai and Hyderabad who found us on

”

Google Reviews
★★★★☆
4.6/5.0 (412 reviews)
Verified on Google

About the Client

Sant Hirdaram Institute of Management (SHIM) is a well-established private institution based in Bhopal, Madhya Pradesh, offering UG and PG programs in Management (BBA, MBA), Commerce (B.Com, M.Com), and professional courses under the aegis of the Sant Hirdaram educational trust. The institution is affiliated with Barkatullah University, Bhopal, and is known for its industry-connected curriculum, experienced faculty, and strong alumni network across Central India. Annual intake target: 1,200 students. Key admission window: February–June, with a secondary intake in August.

The Challenge

- Declining admissions: newer deemed universities with aggressive digital marketing budgets (₹30L+/month) were eroding SHIM's market share in Bhopal and Central India.
- Competitor colleges dominating Google SERP for program-specific queries — SHIM had zero Search presence for high-intent terms like 'BBA admissions Bhopal 2025' and 'best MBA college Bhopal'.
- Long purchase cycle (3–6 months from research to enrollment) requiring multi-touchpoint nurturing across Search, Display, and YouTube.
- Three distinct audiences needed separate messaging: Students (feature-focused — placements, faculty, campus), Parents (trust-focused — NAAC rating, fee structure, hostel safety), Working Professionals (flexibility-focused — weekend batches, distance learning).

- Coaching division underperforming — JEE/NEET batch strength had dropped 30% year-on-year due to no digital acquisition strategy.

Our Google Ads Strategy

Audience Architecture

Segmented campaigns by program, audience persona, and intent stage. Separate ad groups for Student queries vs. Parent queries — different copy for the same program (Student: 'Join SHIM's MBA Program — 94% Placement Record 2024'; Parent: 'NAAC Accredited Management College Bhopal — Industry-Linked Curriculum, Strong Alumni Network'). Used Custom Intent Audiences from competitor college website visitors for prospecting. In-Market audiences: 'Students & College-Bound', 'Business Education', 'STEM Education'.

Admission Cycle Bid Calendar

Mapped budgets to the admission calendar: January–February (application opening, +30% budget), March–April (entrance exam season, +50% budget on coaching keywords), May–June (peak decision month, +80% budget, highest bids), July–August (second intake window, steady budget). Off-season (Sept–Dec) maintained brand awareness at 40% of peak budget to hold SERP position.

JEE / NEET Coaching	6,400	₹380	810	12.7%
CUET / CAT Coaching	2,800	₹420	310	11.1%

Key Insight — Coaching Division as Lead Engine

JEE/NEET Coaching campaigns delivered the lowest CPL at ₹380 and the highest lead-to-enrollment rate at 12.7% — nearly 2x the UG programs average of 7.5%. Parents of Class 11-12 students are highly active on Google with urgent, specific queries ('MBA admissions Bhopal 2025', 'BBA college Bhopal fees'). Adding urgency elements ('Batch Starting June 10 — 12 Seats Left', 'Early Bird Fee Waiver till May 31') reduced CPL by 28% vs. generic ads. This division generated 41% of all leads on just 22% of the total budget.

“

Last year we were losing students to colleges that were advertising heavily online — we had no presence. This year, not only did we fill 81% of our seats through Google Ads

”

leads, our JEE coaching batches are at full strength for the first time in 3 years.

CASE STUDY 05

Rez My Tour

B2C Travel Agency · Dubai, UAE · Google Search + Display + YouTube

Rez My Tour

Domestic Tours · International Packages · Honeymoon Specialists · Group Travel

📍 Dubai, UAE

Industry

B2C Travel Agency & Tour Operator

www.rezmytour.com

About the Client

Rez My Tour is a Dubai-based B2C travel agency specializing in curated holiday packages for residents and tourists across the UAE. Their portfolio covers International packages (Maldives, Bali, Thailand, Europe, Turkey, Georgia) and regional packages (Oman, Jordan, Egypt, Sri Lanka) along with UAE staycation deals and visa services. Avg. booking value: AED 3,800 per person. Key booking windows: Oct–Feb (winter travel, UAE National Day, New Year), April–June (summer school holiday travel for families), and Eid Al Fitr / Eid Al Adha long weekends. The agency serves a mixed clientele of UAE nationals, Indian expats, and Arab nationals.

The Challenge

- Extremely fragmented market — competing against OTAs like MakeMyTrip and Cleartrip (massive budgets), large tour operators (Thomas Cook, SOTC), and thousands of small agencies — all bidding on the same high-CPC keywords (AED 8–25 for 'Bali holiday package Dubai' and 'Maldives tour from UAE').
- No call tracking — 70% of bookings happened via phone but there was zero attribution back to Google Ads, so campaigns appeared to have near-zero ROI even when they were driving revenue.
- 8-week consideration window: customers research destinations for weeks before booking — no remarketing funnel meant losing most warmed-up visitors to competitors.

- 65% of revenue in just 3 months (Nov, Dec, Jan — UAE peak season) with flat summer performance — no strategy to drive bookings during Jan–Sep.
- The agency's CRM had 14,000 past customer contacts but these had never been activated for Google Ads Customer Match retargeting.

Our Google Ads Strategy

Call-First Campaign Architecture

Given that 70% of bookings were via call, we redesigned the entire campaign strategy around call conversion: Call Ads for top destinations, call extensions on all Search campaigns with Google call tracking (min 90-second duration = qualified call), mobile bid boosts of +40% during peak inquiry hours (6pm–10pm), WhatsApp link extensions for customers who preferred messaging over calls. This gave the client, for the first time, full revenue attribution from Google Ads to phone bookings.

3-Tier Remarketing Funnel

Tier 1 (visited specific destination page, 0–3 days): Shown urgency ad with specific offer ('Bali 6N/7D from AED 2,999 — 4 Slots Left This Month'). Tier 2 (browsed packages, no inquiry, 4–14 days): Shown social proof ad with testimonials and Google review rating. Tier 3 (homepage bounce, 15–30 days): Shown broad inspiration ad for top destinations with soft CTA. Gmail Sponsored Promotions targeting users with emails from MakeMyTrip, Yatra, Thomas Cook domains to intercept competitor consideration.

Customer Match & Seasonal Campaigns

Uploaded the 14,000-contact CRM list to Google Ads Customer Match for upsell targeting (past travellers shown new destinations). Built lookalike Similar Audiences from top 20% bookers. Summer vacation campaigns launched Feb 15 with dedicated 'School Holiday Packages' creative targeting parents. Honeymoon campaign maintained as always-on with high mobile bids targeting recently engaged couples.

Campaign Performance Metrics

Destination-Wise Booking Breakdown

Destination	Spend (₹)	Leads	Bookings	Avg. Booking Value
Rajasthan — Heritage & Desert	AED 39,400	1,020	198	AED 2,200
Kerala / Himachal Pradesh	AED 30,800	860	152	AED 2,600
Bali & Thailand — Packages	AED 62,800	1,580	246	AED 3,200
Dubai & UAE — City Packages	AED 46,600	980	168	AED 4,800
Europe — Group & Custom	AED 52,400	640	108	AED 9,200
Honeymoon Packages — All Dest.	AED 45,200	1,760	248	AED 4,200

Key Insight — Honeymoon Campaigns + Dedicated Landing Pages

Honeymoon packages delivered the highest booking volume (248 confirmed) and a 14.1% click-to-booking rate — nearly 2x the industry average of 7-8%. The key driver was a dedicated honeymoon landing page featuring real couple testimonials, a 'Build Your Package' interactive

widget, and WhatsApp as the primary CTA (couples preferred WhatsApp over phone calls). This combination drove a 3.2x improvement in conversion rate vs. the generic packages page. Honeymoon campaigns also had the lowest CPL at ₹380 despite targeting a premium audience.

“
Before Obsidian, we had no idea which of our Google Ads were actually driving bookings because everything came through calls. They set up proper call tracking and suddenly we could see exactly which campaigns were working. Our off-season bookings tripled in the first year — that alone justified the entire annual marketing budget.”

— Omar Al Rashidi, Founder & CEO, Rez My Tour · Dubai, UAE

Team, confirmed 3 Maldivs bookings this week from Google leads. Total AED 38000!

3:14 PM

Excellent Omar! Maldives campaign CTR of 9.2 percent — highest in the account.

3:17 PM ✓✓

Before call tracking we had no idea Google was working. Now we see everything.

3:19 PM

Exactly! Full attribution changed the picture. ROAS tracking at 12.2x now.

3:22 PM ✓✓

Please prepare monthly report. Will share with my investor.
